What to Use and Avoid on Faces That Perspire

Skin to be healthy must breathe. It also must perspire—must expel, through the pores, its share of the body's waste material. Creams and powders clog the pores, interfering both with elimination and breathing, especially during the heated period. If more women under-stood this, there would be fewer selfruined complexions. If they would use ordinary mercolized wax instead of cosmetics, they would have natural healthy complexions. This remarkable substance St. Louis 42 actually absorbs a bad skin, also unclosed in the pores. Result: The fresher, younger under-skin is permitted to breathe and to show itself. An exquisite new complexion gradually peeps out, one free from any appearance of artificiality.
